

# Engage Early Readers for Lifelong Learning

- ✓ By the age of 2, children who are read to regularly display greater language comprehension, **larger vocabularies, and higher cognitive skills than their peers.**<sup>1</sup>
- ✓ Children's early vocabulary skills are linked to their economic backgrounds. By 3 years of age, there is a **30 million word gap** between children from the wealthiest and poorest families.<sup>2</sup>
- ✓ **34 percent** of children entering Kindergarten **lack the basic language skills** needed to learn how to read.<sup>2</sup>
- ✓ Starting in Kindergarten, if a student reads **20 minutes a day, they will hear 1.8 million words per year.** They will have read for 851 hours by 6th grade and on standardized tests, they will likely score better than 90% of their peers.<sup>3</sup>
- ✓ Books contain many words that children are unlikely to encounter frequently in spoken language. **Children's books contain 50% more rare words** than primetime television or even college students' conversations.<sup>4</sup>

**Reading aloud is the single most important thing** to help a child prepare for reading and learning. In fact, reading aloud every day for **at least 15 minutes** to "feed a child's brain," builds vocabulary and other pre-literacy skills, and powerful social-emotional skills.<sup>5</sup>

Exposing kids to e-books could **increase average reading levels by up to 8.4 months.**<sup>6</sup>

**Access to an e-book platform also improved kids' reading comprehension.** The number of boys who thought reading was difficult dropped from **28% at the start of the study, to 15.9%** by its end. The percentage that felt reading was cool rose from **34.4% to 66.5%.**<sup>6</sup>

**The percentage of children [involved in the e-book study] who enjoyed reading books on paper jumped from 10% to 40%.**<sup>6</sup>
