

Reading With Frequency

Increase academic achievement and improve social-emotional outcomes with Learning Ally's research-based reading goal.

Goal Setting Targets: **33 Days** at **20 Minutes**
reading in a school year of reading on each of those days

At least 20% of your school enrollment could benefit from achieving Reading With Frequency with Learning Ally

[Log in](#) to Learning Ally to monitor progress on your dashboard. You'll love watching as students move from getting started to Reading With Frequency.

Educators agree that more reading is always better. In fact, research shows that reading engagement is directly linked to higher levels of reading achievement¹.

Based on an extensive review of reading data with Learning Ally human-read audiobooks nationwide, **33 days of reading for 20 minutes per day** for a student consistently skyrockets them into higher levels of reading achievement. Learning Ally defines this as Reading With Frequency, a crucial tipping point based on 33 days of reading, which leads to improved social-emotional and academic outcomes. **Reading With Frequency** is an important concept to understand when it comes to implementing the Learning Ally solution with fidelity.

When students read with Learning Ally human-read audiobooks more often, their word exposure increases, their vocabulary expands and they reach full comprehension of grade-level texts.

33 days of reading is not the finish line! Around 33 days is merely the tipping point at which we start to see improved social-emotional and academic outcomes for students.
