HOW TO FIND AND ADD BOOKS

Provide Students with the Human-Read Audiobooks They Want and Need to Read

Once a student has been qualified for Learning Ally, the student or educator can begin adding books to their account in the Learning Ally Audiobooks App. Browse audiobooks by grade level, Lexile level, subject or categories, including curriculum and great start books. Search using a keyword or the book title, author or ISBN number.

Follow these steps to add books for educators:

1. Log in and visit LearningAlly.org/Browse-Audiobooks.
2. Choose the book you would like to assign.
3. Select “Add to Bookshelf” to bring up a list of your students. If you don’t see your student, don’t forget to change the dropdown to “All Students.”
4. Select the student or students you would like to add the book for or select the entire grade level.
5. Select “Assign Audiobooks.”
6. Have students log in to the app and select “Update my Books” to see the new books you have assigned.

Follow these steps to add books for students:

1. Log in to the app and select the icon with the person and three lines next to it.
2. Choose “Add Books” to be taken to the Learning Ally website.
3. Find the book and select “Add to Bookshelf.”
4. Go back to the app and select the icon with the person and three lines next to it again.
5. Choose “Update my Books.”
6. Visit your bookshelf and select it to begin downloading the book to your device.

Congratulations, the student can now begin reading audiobooks and you can start to review their reading data on your dashboard!
